Projects

FreshCart :

<https://freshcartsiteecommerce.netlify.app>

The project is an E-commerce web application built using Angular. It provides a seamless shopping experience for users, with features such as product browsing, product details, wish list management, cart management, login, register, reset password, and a secure checkout process.

Key Features:

- Integrated external APIs, leveraging Angular's powerful features such as interfaces, routing, services, pipes, models, and guards.
 - Implemented user authentication and authorization mechanisms using Angular, ensuring secure access to the website's functionalities.
 - Home Page: The home page serves as the central hub, displaying various sections to engage users.
 - Categories: The website organizes products into different categories, allowing users to browse and explore items based on their interests. Each category presents a collection of related products.
 - Product Search: Users can utilize a search functionality to find specific products by name.
 - Product Details Page: Each product has a dedicated details page that offers comprehensive information.
 - Cart Page: The cart page displays a summary of the items users have added for purchase. Users can view quantities, update product options, and remove items if needed.
 - Payment Page: Once users proceed to checkout, they are redirected to a secure payment page. This page is hosted by a trusted payment gateway provider.
-

Book Fair :

<https://thebookfair.netlify.app/>

Key Features:

- Integrated external APIs, leveraging Angular's powerful features such as interfaces, routing, services and pipes.
 - Home Page : It contains the most popular books, a club for modern books, and a section of book topics that you might be interested in reading about.
 - All books: You can find any book you want on this page and also search for a book by its name.
 - Authors: This page contains many authors, and you can search for an author by their name, and all their works will appear.
 - Topics: Through this page, you can search for a specific topic, and books related to that topic will appear.
-

Games Reviews :

<https://an-fahmy.github.io/Games-Review/>

Key Features:

- Developed with HTML, CSS, JavaScript, OOP, APIs, jQuery, Bootstrap, and some libraries.
- OOP and API were used to fetch and display the content.
- This site contains a lot of games and information about each game.
- Each section contains its own games and is easy to navigate between sections.
- Each game contains its own link where you can download it or play online.

Weather :

<https://an-fahmy.github.io/Weather-App/>

This app combines modern technology and a user-friendly design to deliver real-time weather updates and forecasts.
